

Ahmed Ali Abdellatif

Full-Stack Software Engineer

Cairo, Egypt · +20 100 846 4127 · hello@theahmedali.com · theahmedali.com · github.com/AhmedAli-00ne · linkedin.com/in/ahmed-ali

Open to full-time, part-time and freelance — remote or on-site

Full-stack software engineer focused on shipping complete systems end-to-end — C#/.NET + PostgreSQL / EF Core back-ends with JWT-refresh auth and role-based access, behind React / Next.js and Angular front-ends. Recently proposed, built, delivered and self-hosted a live client platform single-handedly — two front-ends, a shared ASP.NET Core 10 API, auth, server-side PDF generation and Linux / Caddy hosting. Comfortable owning a feature from the database to the UI.

EXPERIENCE

App Blender — Full-Stack Developer 2023 – Present

Web, mobile and SaaS products for clients across the MENA region, built across the stack — C#/.NET + PostgreSQL / SignalR back-ends with Angular and React front-ends.

- **LConnect** — a talent-acquisition app for Egypt's creative industry: talents post their work and get scouted, while casting offices & production houses post briefs and book studios / locations in-app. Cross-platform (Ionic + Angular on Capacitor, iOS & Android) on a C#/.NET API with real-time SignalR and JWT; built the app, marketing site and moderation back-office.
- **Zaseva** — Angular admin console: data tables, dashboards & charts, rich-text, maps and exports — with role-based access over a .NET API (SignalR + JWT).
- **FemGem** — e-commerce SaaS: built features across the app, website, and admin & vendor panels.

Independent — Full-Stack Developer & Designer

- **Genoa Tours — tourist submission & approval platform** (client): proposed, built, delivered and self-hosted the entire three-part system — a partner portal (agencies in Algeria & Morocco file tourist manifests), an internal staff admin console and a shared ASP.NET Core 10 + PostgreSQL + EF Core API. JWT-refresh auth with four-role access, server-side Arabic PDF generation, bilingual EN/AR (RTL); front-ends in Next.js 16 / React 19 / TypeScript.
- **TheSkyDesign — studio console** (client): bookings, client portal, project timelines and asset hand-off — a TypeScript front-end on a C#/.NET API with role-based access.
- **Editorial portfolio sites** — designed, built, tested (Vitest + Playwright) and self-hosted (Linux VPS · Caddy · systemd): mohamed-abdelwahab.com, thewed-films.com (Edge API WhatsApp relay, FFmpeg pipeline), zilleg.com and theahmedali.com — an interactive WebGL "star atlas" built with custom three.js shaders.

Orange Business Services — IT Intern Aug – Sep 2021

- Hybrid network operations — designing, implementing and managing networks that integrate on-premises and cloud infrastructure.

TECHNICAL SKILLS

Backend	.NET, ASP.NET Core, Node.js, NestJS, EF Core, PostgreSQL, REST APIs, SignalR, JWT, RBAC
Languages	JavaScript, TypeScript, C#, Python, SQL, HTML, CSS, GLSL
Frontend	React, Next.js, Angular, Ionic, Tailwind CSS, GSAP, three.js / WebGL
Tooling	Vitest & Playwright (unit / E2E), Git, CI/CD, Capacitor (iOS & Android), Linux VPS, Caddy, systemd

EDUCATION & CERTIFICATIONS

MSA University B.Sc. Computer Science Graduated Sep 2024	Web Development Challenger Udacity · Aug 2022 Professional Front-End Web Development Udacity · Nov 2022	LANGUAGES English Arabic
